PUSPAKOM STRENGTHENS POSITION WITH ISO 22301:2019 BCMS CERTIFICATION

SHAH ALAM, 19 February 2025 - PUSPAKOM Sdn. Bhd. ("PUSPAKOM") has reinforced its position as a leader in the vehicle inspection industry by obtaining the ISO 22301:2019 Business Continuity Management System ("BCMS") certification.

The ISO 22301:2019 certification, awarded by SIRIM QAS International, demonstrates PUSPAKOM's readiness to face any unexpected disruptions or disasters and continue its operations. PUSPAKOM is the first company within the DRB-HICOM Group to achieve this certification, marking the sixth ISO certification received by the inspection company.

PUSPAKOM's Chief Executive Officer, Mahmood Razak Bahman emphasised the importance of this achievement in ensuring the continuity of high-quality services to customers.

"This certification reflects our commitment to customers, showing that we are always prepared to face unexpected events, including natural disasters. This system ensures that our operations are protected, and that recovery is swift," said Mahmood.

In July last year, PUSPAKOM also implemented the e-Invoicing system ahead of the national rollout date of 1 August 2024. The implementation of e-Invoicing by PUSPAKOM on 25 July 2024 demonstrates the company's commitment to ensuring efficient and transparent transactions for its customers.

"The early implementation of the e-Invoice system, ahead of the deadline set by the Inland Revenue Board of Malaysia (IRBM), reflects PUSPAKOM's commitment to ensuring more transparent, efficient, and integrity-driven transactions. This initiative
